## Robotically-Enabled Phlebotomy Patient Flow System

### THE FASTEST PHLEBOTOMY PATIENT FLOW

Phlerobo system coordinates and optimizes the patient flow in outpatient blood collection units. Tubes are labelled and directly served to phlebotomists by robots. Patients can make contactless check-in via kiosks or by using a patient-facing mobile app. The mobile app allow patients to see off-peak times, make reservations and receive personalized calls.

Phlerobo speeds up patient flow by 3.5 times compared with queuing systems.

1

**ECONOMIC  
EFFICIENCY**  
SAVES MONEY

2

**FASTER SERVICE**  
PATIENT FLOW SPED  
UP 3.5 TIMES

3

**ERROR FREE**  
HUMAN ERRORS  
BLOCKED

**Contactless  
check in**  
via kiosks or mobile  
app.

**Robotic tube  
labelling**  
Robot NESLİ labels  
and presents tubes  
directly to  
phlebotomist.

**Mobile App**  
Patients can make  
reservations and  
check in with a  
mobile app.
